

THIS IS A DRAFT OF YOUR FEATURE.

Please indicate changes on this sheet and fax back to 703-734-6314 or send an e-mail with specific instructions. Please do not send unmarked edits in Microsoft Word.

TO APPROVE THIS DRAFT FOR PUBLICATION:

• **Review all copy for accuracy.** Give particular attention to proper nouns (especially names and titles), phone numbers, mailing addresses and Web sites.

• **Be advised NewsUSA edits and proofreads in accordance with Associated Press style and recommends clients follow this newspaper standard.** AP style precludes the use of items including: registration marks (®), trademark symbols (™), brand names in all capital letters, underlining, and certain uses of italics, boldface copy, parentheses or quotes. Deviation from this accepted newspaper standard will negatively affect your placements, and thus, NewsUSA reserves the right to pull its placement guarantee at the executive editor’s discretion.

By approving this feature, you agree to hold harmless and defend NewsUSA from its content and publication.

**** IF YOUR DRAFT IS MISSING A PHOTO, DO NOT SIGN OFF UNTIL IT HAS BEEN PLACED IN THE STORY.**

If you are *completely satisfied* with this version, sign and return by *fax* to 703-734-6314 or by *email* to jmaurer@newsusa.com.

Copy produced by NewsUSA is copyright-free and may be freely used as long as attribution to NewsUSA is made in its byline so usage may be tracked.

HEALTH

Concussions Among Athletes

NewsUSA

(NU) - Notice how many professional athletes have been sidelined lately by concussions?

Experts have, and – with the problem also affecting youth sports from soccer to bicycling to football

Athletes like hockey players are prone to concussions.

– they’re labeling it “a national epidemic.”

“Not only are most athletes susceptible to concussions from collisions, but in pro hockey alone there are more than 50,000 ‘hits’ annually – and too many are serious injuries to the head,” says Dr. Ted Carrick, board-certified chiropractic neurologist and distinguished professor of neurology at Life University, who treats professional athletes from around the world, and is active in the Foundation for Chiropractic Progress.

A concussion is a type of traumatic brain injury caused by a bump, blow or jolt to the head that can change the way the brain functions. Symptoms include dizziness, instability and confusion.

Using methods that rely on brain-based, non-invasive, drug-free approaches – like chiropractic care and physical rehab – can help re-establish balance and maximal brain and nervous system functionality. Doctors of chiropractic are trained in recognizing signs of concussions, and directing appropriate care or referral as part of an integrated health team. Learn more at www.yes2chiropractic.org.
