

# COMMON PAINKILLERS RAISE RISK OF HEART ATTACK

80% of all Cardiovascular Disease deaths are due to **HEART ATTACKS and strokes**

90% of all NSAIDs are associated with heightened risk of **HEART ATTACK or stroke**

## HIGH DOSES

of NSAIDs products such as ibuprofen, naproxen, diclofenac, celecoxib & rofecoxib

**INCREASE RISK OF HEART ATTACK**

**THINK**   
"NON-PHARMA FIRST!"

and avoid the use of these risk-laden drugs whenever possible.

## CHIROPRACTIC IS A SAFER PAIN MANAGEMENT APPROACH

Drug-Free

First-line care for musculoskeletal pain, especially neck and back for pain reduction

Improved function enhancing the ability to better perform everyday activities

Safe and effective approach to pain management

It's time to rethink the drug management of pain. Consult your chiropractor for advice and counsel to help you to get out of pain and back to living the non-pharma way!
