

CONNECTIONS MATTER.

Even a slight misalignment of the spine, know as a **subluxation**, can disrupt critical pathways between your brain and the spine, throwing your body into disarray.

CONNECT WITH A DOCTOR OF CHIROPRACTIC FIRST.

DID YOU KNOW:

Subluxations can cause nerve pressure equivalent to the weight of a quarter on your hand and can reduce the nerve impulses by 60%. (www.axischiropractic.com)

Your nervous system (protected by the skull and spinal column) is important because it controls the function of virtually every cell, tissue, organ, and system of your body. Any interference to this system may cause body systems to malfunction. Yes. Connections DO MATTER. So connect with a Doctor of Chiropractic.
