

# WHAT YOU DON'T KNOW CAN HURT YOU.

## Foundation for Chiropractic Progress

**Subluxation:** It's the most important word in healthcare you've never heard of. Simply put, a subluxation is a misalignment of your spine - and even a misalignment the equivalent to the weight of a quarter on your hand can reduce nerve impulses by 60%! So if you are suffering from back pain, frequent headaches, problems sleeping, neck/leg/knee/foot/hip pain - then you already know what a subluxation can do to your body.

It's more than just a "word of the day." **IT'S THE UNDERSTANDING OF A LIFETIME.** Think about it.

**Avoid drugs and costly surgery and align yourself with a Doctor of Chiropractic first!**
