THIS IS A DRAFT OF YOUR FEATURE.

Please indicate changes on this sheet and fax back to 703-734-6314 or send an e-mail with specific instructions. Please do not send unmarked edits in Microsoft Word.

TO APPROVE THIS DRAFT FOR PUBLICATION:

• **Review all copy for accuracy.** Give particular attention to proper nouns (especially names and titles), phone numbers, mailing addresses and Web sites.

• **Be advised NewsUSA edits and proofreads in accordance with Associated Press style and recommends clients follow this newspaper standard.** AP style precludes the use of items including: registration marks (®), trademark symbols (™), brand names in all capital letters, underlining, and certain uses of italics, boldface copy, parentheses or quotes. Deviation from this accepted newspaper standard will negatively affect your placements, and thus, NewsUSA reserves the right to pull its placement guarantee at the executive editor's discretion.

By approving this feature, you agree to hold harmless and defend NewsUSA from its content and publication.

**** IF YOUR DRAFT IS MISSING A PHOTO, DO NOT SIGN OFF UNTIL IT HAS BEEN PLACED IN THE STORY.**

If you are *completely satisfied* with this version, sign and return by *fax* to 703-734-6314 or by *email* to jmaurer@newsusa.com.

Copy produced by NewsUSA is copyright-free and may be freely used as long as attribution to NewsUSA is made in its byline so usage may be tracked.

HEALTH

Preventing Type 2 Diabetes

NewsUSA

(NU) - You can't blame it on your parents anymore.

A new study by the Harvard School of Public Health makes clear that your genes "take a back seat" to behavioral and lifestyle

Healthier lifestyles can reduce chances of Type 2 diabetes.

factors when it comes to developing Type 2 diabetes, and that – where men are concerned – lifting weights for just 30 minutes a day, five times a week, can cut your risk by as much as 34 percent. Make that as much as 59 percent when weights are combined with aerobic exercise.

Women, too, can benefit from a healthier lifestyle. Separate data suggests that 90 percent of Type 2 diabetes in females can be attributed to things like excess weight, smoking and alcohol use.

"Clearly, this is a preventable disease, and sadly about 6 million of the more than 24 million American diabetics don't even know they have it," says the Foundation for Chiropractic Progress' Gerard W. Clum, DC. Aside from treating any aches and pains from all that exercising, today's chiropractors counsel patients on ways to improve their health.
