

# CHIROPRACTIC: A SAFER STRATEGY THAN OPIOIDS

Recent recommendations from the CDC, FDA and IOM call for a shift away from opioid use toward non-pharmacologic approaches to address chronic pain.

## AMERICANS WANT & DESERVE CHIROPRACTIC CARE

Chiropractic care is a conservative, non-pharmacologic approach and important option for pain management – particularly for back, low back and neck pain, headaches, neuro-musculoskeletal and other related conditions.
